The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “fin is in the shape of a hollow rectangular box with 5 faces” of claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Aside from the awkward phrasing of claim 1 due to the translation from the priority document, claim 1 is indefinite in that there is no proper antecedent basis for "each embedding section". The claim should clearly point out that embedding sections are provided on the fixing bar corresponding to the spaced securing holes on the top surface of the accommodating channel, and the wording of the claims should be clarified to employ proper idiomatic English.

Claims 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

These claims are allowed because prior art teachings (Kuo et al., Wang et al.) show fins with edges having grooves forming channels when joined into which fixing/assembly bars are received, but lack the claimed holes in the grooves that align when the fins are assembled and receive an embedding section on the "fixing bar".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references show various stacked plate heat sink assemblies.
